

INFORMED, INSPIRED – IGNITE STUDENTS' INTEREST IN THE ENERGY TRANSITION!

Shaping the energy transition, discovering careers, designing the future!

WHAT IS NEFI AND WHY DO WE GO TO SCHOOLS?

The climate crisis is the reality facing today's youth. Frustration is growing over apparent inaction and a lack of solutions.

NEFI – New Energy for Industry is an innovation network of research, industry and public institutions. We study, develop and implement groundbreaking technologies with the aim of driving the transition to a climate-neutral industry.

In schools, we explain the challenges of the energy transition in a scientifically sound manner and show perspectives, solutions and opportunities to become active.

WHAT QUESTIONS WILL BE ANSWERED DURING THE SCHOOL VISITS?

- Why do we need a rapid energy transition?
- What challenges do we face?
- What innovations and solutions are already available today?
- What does the term “greenwashing” mean?
- How do I read a sustainability report?
- What are the benefits of the energy transition for companies, the population and me personally?
- How can I be or become an active part of the solution?

THAT SOUNDS PERFECT! WHAT'S NEXT?

If we sparked your interest, contact the NEFI team!

Afterwards, the NEFI team will reach out to you to tailor the service to the knowledge level of your students and to arrange an appointment.

This complimentary service is currently available to students in grades 10–12 in the Upper Austria region.

Discover new perspectives together with us and be inspired by innovative solutions!
